

Work Report 7/18/11 – 7/28/11

This pay period we started working at Black River Ranch. We picked up where we left off last season on the East Branch Black River. The last few structures were completed there, and we have now moved over to the main branch. Without the luxury of having a forester stage material at the rivers edge, our progress is a little slower than last year. However, due to an abundance of woody debris close by we were able to complete 24 structures in the past 2 weeks.
